Removal Vehicles Range

The Surelift

Engineered for efficient operations, the smart design of the Surelift has capacity for four stretchers or coffins courtesy of a motorised, dual height deck area.

Safety and ease of operation are paramount, with quiet, powerful actuators at each corner of the upper deck capable of lifting 300 kg designed to maximise efficiency and minimise manual handling risks.

The Surelift is discretely operated via a sealed, wipe clean switch unit mounted on the rear door pillar, with strong but light-weight loading ramps on each deck to securely lock in place for transit.

The Surelift can be fitted to a wide range of van-based vehicles including the Transit Custom, Mercedes Vito and Renault Trafic.

ELECTRO-HYDRAULIC

Electro-hydraulic system ensures a quiet and safe lift, every time.

The Fixed Deck

Designed for **discretely carrying out their duties**, we offer single and twin fixed deck conversions, which can be fitted with adjustable coffin stops or stretcher clamps to suit your requirements.

Single Fixed Deck

Widely specified for estate cars and MPVs, this configuration features a permanently fixed one-piece, single deck with capacity for two standard stretchers, coffins or a combination of both.

Twin Fixed Deck

For greater capacity, a twin deck option is also available on a range of vans. The upper deck has capacity for two or three stretchers or coffins, and the lower deck two large stretchers or coffins.

Clever storage boxes are also built in to the side door opening apertures.

EXTRA STORAGE

Storage boxes cleverly built in to the side door opening apertures.

The Z Fold

Ingeniously designed to provide a fold-away deck in MPVs and estate cars that are not solely used as removal vehicles, the Z Fold offers exceptional flexibility.

Available on a range of MPVs and estate cars, the Z Fold can be configured to provide deck only or deck and rear passenger seating. Careful specification of base vehicles with large interior capacity ensures driver leg room is not affected.

Offered with a wide range of versatile deck fittings, including rollers, stops and front rails, the Z Fold is engineered **with ease of use and flexibility front of mind.**

The ingenious design allows the deck to fold up and down for storage, easily converting from a standard vehicle to a removal vehicle in moments and the Z Fold can be readily removed to return the vehicle back to its original form.

FULL PROTECTION

Featuring nylon deck sliders as standard to minimise deck wear and tear and to protect the coffin (rollers are optional).

SPACIOUS UNDERDECK

Fully lined underdeck with capacity for three standard coffins or stretchers.

Ceremony Appropriate

Designed to meet the changing needs of the funeral industry, the Ceremony Appropriate vehicle provides **a modern, cost effective solution** for customers choosing direction cremation or cremation without ceremony.

Based on the stylish, long wheelbase variant of the Citroen Dispatch, the Coleman Milne Ceremony Appropriate vehicle makes full use of the available load area, with a combined deck and underdeck capacity for three standard coffins or stretchers.

Specified in vogue grey, the fixed deck can be configured with a host of versatile fittings. The spacious underdeck is fully-lined and the side doors are **cleverly designed** to provide much needed, discrete storage capacity.

Although this is the first of its kind, the Ceremony Appropriate vehicle retains all the quality and design hallmarks of every Coleman Milne vehicle.
