Ford Hearse and Limousine Range

– COLEMAN MILNE –

The Norwood and Rosedale range of hearses and limousines offers a refined and dignified experience for drivers and passengers alike.

Engineered on Ford's flagship Mondeo Titanium models, our vehicles are brought to life using OEM design techniques and the very latest in manufacturing technology to produce cutting-edge vehicles specifically designed to service the needs of today's funeral director.

Rosedale Limousine

Style, sophistication and class leading passenger space epitomise the Rosedale limousine.

Designed and built for passengers to travel in comfort and with dignity, the large middle door, fixed centre seat and re-engineered rear row access all combine to offer the maximum amount of space and headroom.

With climate control, leather upholstery and an optional full height electric division between the driver and passenger seating areas, the Rosedale offers a **superbly appointed and composed passenger experience.**

Norwood Classic Hearse

Iconic for its expansive glass roof, the Norwood Classic is a blend of traditional, **stately refinement** and stylish modern touches, perfect for the discerning Funeral Director.

Designed and built to be supremely practical, the Norwood Classic is equipped with a two coffin deck, a spacious underdeck and a three bearer option to meet the most diverse of operational needs.

Ambient LED lighting, leather upholstery and a host of in-vehicle technology make this hearse an **outstanding driving experience** coupled with visually stunning looks.

Norwood Hearse

The contemporary style of the Norwood hearse retains the original doors of the base model to create a vehicle with **sleek lines and a distinctive stance.**

In keeping with its stablemate, the Norwood Classic, the Norwood has a large deck area, a two bearer deck as standard and a three bearer deck as an option, providing **ample space.**

A leather interior, burlled amber or contemporary grey deck and a host of in-car driver features make the Norwood an extremely attractive proposition for the modern day funeral director.

Hybrid Norwood and Rosedale

We were the first company in the UK to offer a range of hybrid hearses and limousines, embracing the latest technology to enhance our vehicles.

The Norwood, Norwood Classic and Rosedale can all be specified with **hybrid drive train technology** which combines a petrol engine, electric motor and lithium-ion battery.

For longer journeys, the powerful 2.0 litre petrol engine delivers great economy, while for shorter, slower journeys, the 1.4 kWh electric motor takes over to deliver **whisper-quiet, clean and efficient motoring**.

With a regenerative braking system that charges the battery by capturing up to 90% of the energy normally lost when braking, the hybrid range of Coleman Milne hearses and limousines is light years ahead.

All models:

Engine

- 1.5 EcoBoost 160PS - petrol
- 2.0 Duratorq 190PS - diesel
- 2.0 TiVCT - Hybrid Electric Vehicle 187 PS
